

**Sri S. NIJALINGAPPA.**—We expect that by the end of the Third Plan the requirement will be 906 Megawatts.

**Sri ANNA RAO GANAMUKHI.**—At the time the survey was conducted what was their assessment and afterwards how did other necessities arise and add to the requirements?

**Sri S. NIJALINGAPPA.**—I am not aware of this assessment.

**Sri G. V. GOWDA.**—What is the number of generating units for the 1st and 2nd stage of the Sharavathi project?

**Sri S. NIJALINGAPPA.**—In the 1st stage 2, and in the 2nd stage we hope to have 8.

**Sri G. V. GOWDA.**—If I put it that in spite of the best efforts on the part of Government, the Government could not complete even the first generating unit of the 1st stage by the end of 1963 because of the defective construction, is it not correct?

**Sri S. NIJALINGAPPA.**—This question has been answered a number of times and the difficulties encountered by Government have also been mentioned. We hope to overcome them and come up to the schedule possibly within 3 or 4 months after the scheduled date.

**Sri G. V. GOWDA.**—Will all these 10 generating units be completed by the end of the third plan?

**Sri S. NIJALINGAPPA.**—No. We hope to have 2 plus 6. The other 2 will come up later.

**Sri G. V. GOWDA.**—Even then will there not be shortfall?

**Sri S. NIJALINGAPPA.**—It all depends upon the demand. The demand is going up. As we estimate things today, it may be just sufficient. If more industries are going to come up, we will have to put in more efforts to produce more and that is why we have taken up other schemes on hand.

**Sri G. V. GOWDA.**—Even after completing all the units of the 2nd stage, we would be making use of only 12 per cent of the power potential of the river. Is that not correct?

**Sri S. NIJALINGAPPA.**—We are using only a small portion of the potential that will be available because we have not harnessed all the rivers.

**Sri ANNA RAO GANAMUKHI.**—Supplementary to (b): In the answer here it is stated that if all the generating units of the II Stage are installed by the end of the III plan there may not be any shortfall by the end of the III plan, but in the Plan book it is stated that there will be a shortfall of 100 Mg. Wtts. by the end of the III plan. Is this answer correct or the statement made in the Plan book?

**Sri S. NIJALINGAPPA.**—This answer is correct because this is the latest information.

**Sri G. V. GOWDA.**—Would Government take steps to make available more power to keep pace with the demand?

**Sri S. NIJALINGAPPA.**—It is always the attempt of Government to keep abreast of the time.

**Sri A. S. PATIL.**—What is the power potential of Kalinadi?

**Sri S. NIJALINGAPPA.**—7.5 lakhs kW.

**ಶ್ರೀ ಎಸ್. ನಿಜಲಿಂಗಪ್ಪ.**—ಅತ್ಯಪ್ರಿಯಂಟು ಇಲ್ಲ, ಆಶಾಂತಿಯೂ ಇಲ್ಲ; ಪತ್ರಿಕೆಗಳಲ್ಲಿ ಬಂದಿರುವುದು ಸರಿಯಲ್ಲ; ಈ ವಿಚಾರ ಪರಿಶೀಲನೆಯಲ್ಲಿದೆ.

**Sri G. V. GOWDA.**—In case of failure of the talks for joint investigation of the construction project, would the Government go ahead by itself to take up the project?

**Sri S. NIJALINGAPPA.**—I cannot answer that question offhand.
